***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6, and 8-11 rejected under 35 U.S.C. 102(b) as being anticipated by Kawaguchi '126. Kawaguchi shows a control system for an automatic transmission including a lock up (input) clutch. During shifting of the transmission, the lock up clutch is allowed to slip to reduce shift shocks. The lock up clutch control valve duty ratio is reduced upon the decision to shift the transmission and then reduced again after a predetermined time  $T_i$  when actual shifting operation starts. The lock up clutch is allowed to slip during shifting and is then returned to an engaged condition after a predetermined time upon completion of the shift.

***Allowable Subject Matter***

Claims 4, 5 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
